

APCTP SEMINAR

Black hole information paradox

Dr. Alejandro Rosabal

YST, APCTP

Aug. 5 (Wed) 16:00

#512, Hogil Kim Memorial Bldg.

Abstract

In this informal talk I will present an overview of the black hole information paradox. In parallel I will talk about my recent work and its connection with some new insights related with the so-called replica wormholes and the island rule. In the end I will comment on a possible resolution of the paradox.

■ **On-site**

You can participate in the seminar directly on-site at seminar room #512 of the Center.
