

The 5th International Workshop on Scanning Probe Microscopy

■ **Venue : Lahan, Pohang, Korea**

■ **Period : August 28 (Mon) ~ 30 (Wed), 2024**

■ **Overview**

The ‘International Workshop on Scanning Probe Microscopy(IWSPM)’ focuses on interesting science and engineering research using scanning probe microscopy. The conference topics includes semiconductors and metals, magnetic systems, 2D materials and devices, superconductors and topological materials, biological systems, surface reactions, novel instrumentations, and theory and simulations.
