

Agreement for Cooperation

dated 18 November 2016

Between

The Asia Pacific Center for Theoretical Physics, Pohang, Korea (“APCTP”)

and

The International Union of Pure and Applied Physics (“IUPAP”)

Noting with appreciation the progress made by the APCTP and the IUPAP in accordance with the Agreement for Cooperation signed on November 14, 2013, the two institutions look forward to continued engagement for further strengthening of bilateral ties and have reached an Agreement on the following points in order to foster academic and scientific exchange.

1. The parties will collaborate in developing financial plans to co-sponsor conferences and/or workshops, to be held at sites in either IUPAP Countries or the Asian Pacific Rim, as mutually agreed by both institutions.
2. The parties agree to promote the exchange of scientists, thus helping to advance the training of young scientists, both men and women, in particular from developing countries and especially the least developed of them.
3. Each party will designate a liaison officer to administer this Agreement and to coordinate cooperative activities between the parties.
4. This Agreement may be modified by mutual consent. The Agreement will take effect on the date of signing the Agreement and will last for a period of three years. This Agreement will automatically extend for an additional period of three years at the end of each three-year term unless one of the parties provides written notice to the other party of its intention to terminate.
